

PRO-TEC® II

# SYRINGE SHIELD

*Replacing scratched or broken glass is simple.*

*White coated interior makes it easy to read syringe contents.*

- *Tungsten shielding*
- *Lead glass window, easy to replace*
- *Lightweight*
- *Fits most disposable syringes*

The Pro-Tec® II Syringe Shield reduces hand exposure. It is designed for the clinician who has previously found it difficult to use conventional syringe shields. The Pro-Tec® II is thin, lightweight and easy to use.

The barrel of the shield is constructed of .06" (1.5 mm) thick tungsten that will reduce radiation exposure from Tc-99m by 94%. A 4.2 density lead glass window provides protection and visibility. The interior of the barrel behind the glass has a white coating that improves the view of the syringe and contents. A clip secures the lead glass to the tungsten barrel and makes it easy to replace scratched or broken glass. A stainless steel thumb screw holds syringes firmly in place.

Pro-Tec® II Syringe Shields accommodate the standard sized 1 cc to 10 cc syringes.

*U.S. Patent #4,062,353*
