

PET UNIT DOSE CABINET

Designed for small PET hot labs, this Unit Dose Cabinet provides a space-efficient work area with plenty of shielded storage capacity.

The cabinet supports a Compact L-Block Shield with built-in dose calibrator shield and lead brick cave, a recess mounted sharps container shield, and an Atomlab 100 Dose Calibrator. The dose calibrator is mounted on a stand above the countertop, increasing work space. The stainless steel countertop features a 4" backsplash and .5" spill-proof lip.

The lower cabinet has locking doors, two sliding bottom shelves and two sliding top shelves. The bottom shelves can be used to hold PET shipping containers. The top shelves can be used to store syringes, syringe shields and other small items.

The PET Unit Dose Cabinet is shielded on all six sides with .25" lead and can stand alone or be combined with other cabinets.
